Shirley

Trivia about electricity:

1. What does UL stand for?
2. UL now requires general-use extension cords have (1) safety closures, (2) warning labels, (3) rating information regarding electrical current, (4) other added features for the protection of children and consumers, or (5) all of the above.
3. What does NEC stand for?
4. Heating of the cord to hot temperatures or softening of the plastic is a warning of what?
5. Is it O.K. to use an extension cord that is coiled or looped?

ANSWERS:

1. Underwriters Laboratories
2. (5) all of the above
3. National Electric Code
4. The plug wires or connections could be failing and the cord should be discarded and replaced.
5. No. It causes additional stress on the cord.

Only Stand-by Reservations Left for February Ski Trip

The gentleman pictured above is not Billy Murphy (Dept. 211, retired) hitchhiking to Colorado! Billy will be riding the Amtrak rails along with more than 90 Weoma Ski Club members.

The February 2-6, 1991 trip has proven to be immensely popular. In addition to Billy's party of eight, the club has 79 paid skiers as of August 29 and is accepting 8 or 9 people on a refundable stand-by basis.

Call Teresa Sakalas, x3353, Jim Black, x3901 or Darwin Fager, x3077 to get signed up for a stand-by opening.

Thank You Note—

To All My Friends at AT&T,

For all your warm expressions of love and concern; the flowers, plants, cards, visits, calls, candy, balloons, "command performance by Mary Ann Bennett" - as the visiting nurse, taking care of my work load - what can I say?!?

They were able to remove the tumor and everything looks good.

Love,
Darlene Bosworth

Tribute to Blood Donors

A blood donor is good for people who go through windshields and red lights. For somebody with leukemia.

For people being operated on. For barefoot kids who aren't careful. For people who are into feudin' and fightin'. For hemophiliacs and daredevils.

For people undergoing dialysis while waiting for a kidney transplant. For people who fool around with guns. For little kids who manage to uncap a bottle of something poisonous.

A blood donor is good for people who have been badly burned. For new mothers who need transfusions. For new babies who need a complete change of blood supply.

For people having open-heart surgery. For cancer patients. For people with severe hepatitis and anemia. For kids who fall out of trees or whatever.

For anybody any age with bleeding ulcers. For people who were in the wrong place at the wrong time.

A blood donor is good for people who are in a lot worse shape than most people you know.

A blood donor is good for life.
